-------------------	-------------------------------------	---------------	--------------------------	---------------	--------------------------	-------	--------------------------

Description of Work and Main Use or Purpose:
Earthworks to provide access and building platform

Special Conditions:
All excess material not held behind a properly designed and constructed retaining wall is to be removed from the site to an approved fill disposal area.

Re-establish vegetation cover on all exposed cut surfaces.

Construct a silt trap and direct all stormwater originating from the exposed surfaces into the silt trap to remove silt and debris from the storm water runoff prior to its discharge from the site.

Retain all existing vegetation cover down slope of the proposed earthworks to facilitate the filtering of silt from the stormwater runoff.

Silt traps where required shall be constructed in accordance with A.R.C. publication TP90.

Permission is hereby granted to carry out the proposed works described herein in accordance with the approved drawings, documents and all conditions imposed: such work to be subject at any time during progress to inspection and to be carried out in strict conformity with the requirements and subject to the contractor taking full responsibility for any damage done to any works such as telephone cables, power mains, sewers, pipes, footpaths, road or other services or an adjacent property.

Dear Sir / Madam

RE: Earthworks Permit Applications, 25 Taumatawiwi Street, Opononi 0452

Attached is a copy of the earthworks permit for the above-mentioned property.

Please note that there are site specific conditions listed on schedule B (the Permit).

Additionally, all earthworks are subject to the following standard conditions:

1. The applicant is to establish and mark the location of boundary pegs and mark all property boundaries adjacent to the proposed earthworks. No authorisation is given for works on private property other than the lot subject to the Earthworks Permit.
1. The applicant is to ensure that stormwater diversion and silt control measures are in place prior to the commencement of bulk earthworks.
2. The applicant is responsible for the repair and reinstatement of any underground services damaged as a result of the earthworks.
3. The applicant is responsible for the repair and reinstatement of the road carriageway, the kerb and footpath damaged as a result of the earthworks. Such works where required will be completed to the satisfaction of the Council's Roading Manager.
4. Any debris deposited on the public road as a result of the earthworks shall be removed by or at the expense of the applicant.

Yours faithfully

Rex Shand
